ESTABLISHED 1907.

Introduction.

THE PREMIER HOUSE FOR DAFFODILS, KIDDERMINSTER.

July, 1910.

To Our Friends and Supporters.

ANOTHER planting season has come round, and in sending out our complete

List of Daffodils and Narcissi

for the present season, once again we have the pleasant task of thanking our numerous friends for their kind support. That this kindness has exceeded our most sanguine expectations may be gauged by the fact that at the end of two years' trading our correspondents number almost two thousand.

When we commenced this business it was in the firm belief that the Daffodil had by no means reached the zenith of its popularity. Every year the circle of Daffodil enthusiasts widens, and during the past two years we think we may fairly claim to have created still further interest in the flower, and persuaded numbers of our friends to take up its culture.

It has been our aim and object to set the Daffodil before the Public in the most attractive way possible, both by exhibiting the many beautiful new seedlings, and also by explaining how easily they may be produced by the simple method of hybridisation.

On another page we append a list of the remarkable successes attained by us this year, which constitute a record that any firm might well be proud of.

For three years in succession we have secured the **Championship** of the great Midland Daffodil Society's Show, and for the last two years the **Premier Medal** at the Royal Horticultural Society's Forced Bulb Show.

These successes afford a striking testimony to the great care and attention that we bestow upon the culture of all our bulbs, and no words of ours are needed to endorse this fact.

We need scarcely add that it will be our earnest endeavour to maintain this high standard of excellence of our **English Grown Bulbs**.

The season of 1909 was one of peculiar difficulty to all bulb growers owing to the extremely wet season which prevented the Bulbs from being properly ripened, and thus caused serious delay in despatching them. In spite of this we have had most excellent reports of our Colonial shipments, and although it is not our practice to publish Testimonials, we cannot refrain from reproducing the following letter:

New South Wales,

October 8th, 1909.

MESSRS. CARTWRIGHT & GOODWIN.

Dear Sirs,—I beg to acknowledge receipt of box of Daffodils, in excellent order, and to thank you for the great care you have taken in executing my order. I have never from any source received such remarkably fine bulbs, nor did I imagine that such varieties as Chaucer and Virgil, for example, could make such enormous bulbs as those you sent.

I am more than satisfied, and hope to give good accounts later on.

With thanks for your attention and care,

I remain,

Yours faithfully,

(Signed) H.S.

LOW PRICES.

With such a reputation to uphold we do not attempt to compete with those houses who undersell us at the expense of quality, but in comparing our prices with those of other firms we would remind our customers that

- (1). We pay Carriage.
 - (2). We make no Charges for Boxes or Packing.
 - (3). We allow a good Discount for Cash.
-

ORDER EARLY.

Early Orders are always very much appreciated, as they allow us to make headway with their preparation before the press of the Autumn Season commences.

To the Customer, the advantages of ordering early, may be summed up as follows:—

- (1). It secures the **first pick** of the Bulbs.

(2). As all orders have the **personal attention** of one of the partners, and are taken in **strict rotation**, it enables delivery to be made during August, which facilitates early planting or potting. This in itself is a matter of considerable importance, because to secure first-rate flowers and the maximum of increase, **Daffodils must be planted early.**

To emphasise this point, we have only to mention the fact that Mr. Engleheart, to whom we owe the wonderful new strain of Pheasant Eye Narcissi, commences to replant his Bulbs of these in July.

How to Grow Daffodils from Seed.

Our Pamphlet on the above subject met with the liveliest appreciation from both Amateur and Professional Gardeners. With the small clerical staff at our disposal it has been quite impossible to reply to the thousands of letters—most of them couched in the most flattering terms—which we continue to receive, congratulating us upon its publication, and we now desire to tender to all our correspondents our most hearty thanks for their kindness.

We intend to fulfil our promise to issue a Revised Edition in the near future, and with this object in view have collected a large number of notes dealing with the subject.

A few Copies of the 1908 Edition may still be had on application.

T E R M S .

The prices in this List only hold good till **October 14th**, and only so long as we are unsold.

All Orders for Bulbs to the value of **10/-** and upwards will be sent **Carriage Paid** to any Railway Station in the United Kingdom.

No Charge will be made for Packages.

Orders for Bulbs under **10/-** in value will be sent Carriage Forward, but an allowance in Bulbs for Carriage to the value of **5 per cent.** of the value of the Order will be added to all Orders over **5/-**

Collections and special quotations are not subject to discount.

All Orders of **£2 and over** will be subject to a discount of **5 per cent. when Cash is sent with Order.**

Orders under **2/6** in value are not solicited, and are charged extra for packing.

Not less than **6** at dozen rate or **25** at **100** rate.

All accounts, both trade and retail, are due nett at Christmas.

Notices to Our Foreign and Colonial Correspondents.

Foreign and Colonial Orders are welcomed, but must be accompanied by a remittance or draft.

No Discount can be allowed except on Orders amounting to **£5** and over, but Postage **will be paid** on Orders of **£1** and over if **5 per cent.** be added to the amount of Order.

Orders of **£5** and over will be sent **Post Free.**

Parcels too heavy for Post are sent Carriage Forward per Mail Steamer.

Our Shipping Agents are Messrs. W. Bauer & Co., 72 Mark Lane, London, E.C.

Canada and British Columbia.

Our Sole Agent is:—

Mr. H. S. Goodwin,
Crawford Bay, Kootenay Lake,
British Columbia.

To whom Orders and enquiries may be addressed.

SPECIAL NOTE.

We have endeavoured to make several improvements in this present List, notably by the addition of an **Index**, also by giving lists of the best varieties for **forcing** and **naturalising**, and stating the period at which all the varieties bloom.

COLLECTIONS.

We should like to draw special attention to the collections on pages 51 to 54. With most firms it is an invariable practice **not** to state the names of the varieties included in their collections, the result being that the purchaser frequently receives sorts that are obsolete or not worthy of culture. In our own case we select **only first-rate varieties** and **give their names** so that the purchaser knows what he will get for his money.

N.B.—We enclose with this List a Post Card, and shall be most grateful to those of our supporters who will furnish us with the names and addresses of any lovers of the Daffodil to whom we could send it.

In return for this slight trouble it is our intention to present to the friend who secures us the largest number of new customers by **September 30th**, a bulb of the exquisite Trumpet variety "**Leiden Jar**."

Daffodils for Forcing & Growing in Pots

We make a great speciality of growing varieties that are suitable for these purposes, and for the last three seasons have staged magnificent collections at the Royal Horticultural Society's Shows. "The New Zealand Graphic," Sept. 23rd, 1908, says: "NARCISSUS ETHEREAL."				

"An absolutely pure white Parvi Narcissus is a very uncommon thing. Messrs. Cartwright & Goodwin, Kidderminster, have produced an hybrid to which they give the above name, and which is pure white when it expands. The outer segments are oblong and broad, while the inner ones are ovate and all of them overlapping. The crown is widely cup-shaped, flat and plaited. It is very chaste or ethereal, and someone procured one of the bulbs at a fabulous price for a Daffodil."

The "Engleheart" Daffodil Note Book.

Every Daffodil grower, more especially those who are seedling raisers, should possess one of these most useful note books.

Most people who grow rare Daffodils are fully aware that it is quite the safest and wisest plan to label them by means of numbers instead of their own names.

The "Engleheart" Note Book is admirably conceived for the purpose of carrying out this idea. It is a long narrow book (9 in. x 3½ in.) with stout black cover, and consists of 108 pages. Each page is divided into six spaces, which are numbered consecutively from 1 to 999, only a few pages at the end being left perfectly blank.

The ample space allotted to each number enables every particular such as parentage, description, name, etc., to be entered as well as the number of bulbs.

This note book was planned by Mr. Engleheart, and is regularly used by him. We heartily recommend it to all our numerous customers and correspondents.

Price 3/6 each post free.

If ordered with bulbs 3/- each.

The Wood Plant Club Labels.

Labels are an important item to the raiser of seedling Daffodils. We have tried numerous forms and have come to the conclusion that these are by far the best.

The Ordinary Size, $9\frac{1}{2}$ in. long, name-plate $2\frac{3}{4}$ in. by $1\frac{1}{4}$ in.

Price 1/6 per dozen, 16/2 per gross.

This is admirable for labelling Daffodil beds.

The Small Size, 5 in. long, name-plate $2\frac{1}{2}$ in. by $1\frac{1}{8}$ in.

Price 1/- per dozen, 10/9 per gross.

Recommended for Seed boxes.

Ink for these Labels, 2/- and 3/- per bottle.

A quill pen must be used.

If ordered with bulbs the labels will be sent Carriage Paid,
otherwise Carriage Forward.

EDITORIAL.

"THE LATEST HOBBY."

The well-known and enthusiastic florists, Mr. R. C. Cartwright and Mr. A. R. Goodwin, have lately gone into partnership, as bulb growers at Kidderminster, Worcestershire, and have signalled their commencement by the issue of a pamphlet on how to raise Daffodils from seed, with a list of the finest varieties. Much has been written about Daffodils from one point of view or another, but least of all, perhaps, about seedlings and how to raise them. Anyway, they have got together a considerable amount of information, giving the history of the subject from various notable writers on gardening from the earliest times down to the present.

The authors, after dealing with the general history of the Daffodil in this way, proceed to give the history of each section and sub-section, mentioning the most suitable varieties that have been used or should be used in the raising of new varieties. For instance, under the heading of self yellow trumpet Daffodils, mention is made of the Tenby Daffodil, Golden Bell, Gold Cup, Felicity, Golden Spur, Henry Irving, Santa Maria, King Alfred, Maximus, Emperor, Monarch, and various others of the most handsome Daffodils to grow, or which can be used with the object of procuring something better than we already have.

We have frequently seen the exhibits of these enthusiastic amateur growers, and now that they have commenced trading on their own account, they have left the roll of amateurs, and we have no doubt they will prove equally successful growers as hitherto.

"THE GARDENER," May 9th, 1908.

"A NEW INTEREST."

Up to now the raising of new varieties from seed has been in the hands of a few. The knowledge of how to do it successfully has been so carefully guarded, and the best varieties for the purpose have been so expensive, that the inevitable result has followed, and the pleasure of seedling raising has remained a *terra incognita* to the ordinary Daffodil lover. This Spring, however, a notable event has happened. The new firm of Messrs. Cartwright and Goodwin, with a sort of prophetic prescience, have issued a little green covered book called "The Latest Hobby," but which is really a pamphlet which might well be dubbed "Seedling Raising Explained and Made Easy for Ordinary Folk." What to do and what not to do is made clear. The

best seed bearers and pollen parents are indicated, and full cultural details are given, from the time of sowing the seed till, after the lapse of from five to seven years, the sower is rewarded by a flower. In olden days men in humble spheres of life took a deep and often a successful interest in this cult. John Horsfield, a Lancashire weaver, it must not be forgotten, raised *Horsfieldii* (and this is still one of our best bicolors) in the 'fifties of last century with but slender resources. What he accomplished then can be done to-day in the smallest of gardens, provided, of course, the necessary requisites of knowledge and patience are among the owner's stock in trade.

"THE GARDENERS' CHRONICLE," May 8th, 1909.

WORCESTERSHIRE DAFFODILS.

A FEW days after the Birmingham Daffodil show, I was afforded an opportunity of inspecting Mr. Arthur Goodwin's *Narcissi*, which are grown in a garden on the high ground near Kidderminster, commanding an extensive view over the Severn Valley, and situated at an altitude of 500 feet above sea-level. The soil, which is of fertile loam interspersed with small nodules of sandstone, is excellently adapted to Daffodil culture, as the plants were all in the most perfect health and bore flowers of very large size. Messrs. Cartwright and Goodwin were very successful at Birmingham, winning the Champion prize for the greatest number of points and exhibiting several remarkable flowers, among which were *Giraffe*, *Scarlet Gem*, a new seedling between *Horace* and *Jaune à Merveille*, and the double *Red and Gold*, all of which received Awards of Merit, as well as *Chloe*, *Lemon Star*, *Inga* and *Evangeline*. Mr. Goodwin must, at the present moment, have fully 50,000 seedlings raised from the best varieties, that have not yet flowered. *M. J. Berkeley*, a variety that sometimes proves difficult to grow, was in the best of health with deep blue-green foliage, and was bearing seed; *Golden Spur*, fertilised with special pollen, had the seed-pods well formed. A batch of *Lucifer* seedlings were flowering for the first time, some being very brilliant in the colouring of their cups. *Glory of Noordwijk*, *Weardale Perfection*, and *Emperor* were bearing enormous flowers, and *Lady Margaret Boscawen* was exceptionally fine; a seedling between the last-named variety and *N. calathinus* bearing three flowers on a stem, was very pretty. A cross between *Madame de Graaff* and *Minnie Hume* showed a distinct break in having the trumpet edged with apricot. A very beautiful picture was presented by thousands of the delicate white *Waterwitch* with drooping blossoms swaying in the breeze. *Madame de Graaff* was doing very well, and *Princess Ena* (Award of Merit, R.H.S.) was very similar in appearance. A beautiful flower with a flat, white perianth and green-centred cup edged with glowing orange, was a hybrid between *N. Bernardii*, from the Pyrenees, and a variety of *N. Poeticus*. *Circlet*, which obtained an Award of Merit from the R.H.S. in March, and has a wide, overlapping, white perianth and spreading, yellow cup, was present in numbers. Of trumpets, *Mrs. H. J. Veitch* is one of the best yellows; *Cornelia*, of the same colour, is fine in quality and large; and *Cleopatra*, another golden trumpet, is a striking flower, while *Ailsa*, the whitest of the white trumpets, is a beautiful flower. *Musidorus* is a good late variety raised by Mr. Fingleheart from *N. poeticus* of Linnæus. Others of Mr. Fingleheart's raising were *Commodore*, a very healthy grower of

good habit; Resolute, a hybrid from Grandee; Sceptre, and the double Argent. One of the best of the parvi-coronati section was Ethelbert, raised by Mrs. Backhouse, of Hereford, and shown at Birmingham. There was a lovely collection of Minnie Hume and triandrus seedlings with scarcely a bad flower amongst them, mostly with two blossoms on the stem; and some pretty seedlings between Mme. de Graaff and Minnie Hume. A cross between King Alfred and N. triandrus was flowering in its third year and bearing pale yellow trumpet flowers of exquisite shape. Elvira, a poetaz, was being fertilised with the pollen of brightly-coloured varieties of N. poeticus, and Perfectus, an incomparabilis, with very flat, broad perianth, was being used as a seed-bearer. An unnamed seedling, with pure white, overlapping perianth $4\frac{1}{2}$ inches across and deep yellow cup edged with orange scarlet, should make a sensation when distributed. Other notable flowers were Giraffe, a hybrid between Princess Mary and Mme. de Graaff; Evangeline, with white, broad-petalled perianth and rich yellow cup; Alton Locke; Fusilier, very bright; Ariadne, white spreading perianth, lemon cup; Fairy Queen, a lovely, pure white, one of the most beautiful of all Daffodils; Beacon; Ceres, a cross between Grandee and N. poeticus; the popular Citron, Arnold Rogers (a flower of high merit); Homespun, Incognita, Seagull, Albatross, Blackwell, Katherine Spurrell and J. B. M. Camm.

"THE GARDEN," March 19th, 1910.

Undoubtedly the best group was that of Messrs. Cartwright and Goodwin, who had their graceful arc of flowers full of a great variety of well-staged blooms. Southern Star was probably the one that attracted the largest amount of attention on account of the deep vivid red edge of its widely expanded cup. I was told that it had been out in full flower on February 20th, and that it is one of the best of plants for forcing purposes. It is, as a catalogue describes it, "a most lovely flower." The large, starry, stiff white perianth, and the flat, brilliant, red-edged cup formed an excellent combination, which its earliness and suitability for pots only serve to enhance. Coreen is a well-formed Engleheartii, with a pale primrose perianth, a widely expanded pale yellow cup with a pale orange edge. It has a fine strong stem, and a good constitution. The bunch of old Queen Sophia was very delightful. I wonder whether this variety is like Dr. Fell, and does better in pots than in the open. Fairy, which I have already alluded to, is a very taking flower; its large, bold trumpet singles it out at once as out of the ordinary. For pot-work it should prove effective. Weardale Perfection, and the deep golden yellow Goldfinch were two fine trumpets that gentle forcing obviously suits. The exquisite drooping Ariadne, whose place is in a vase just above the eye-line, must also be mentioned, and with Scarlettta, which was prominent because of its vivid orange red cup, must bring my notes on this group to a close.

J. JACOB.

"THE GARDEN," March 19th, 1910.

Messrs. Cartwright & Goodwin, of Kidderminster, showed one of the most interesting groups of Daffodils we have ever seen, including about sixty exquisite forms. We hope to publish a coloured plate of

a few of the finest. Not only were the flowers exceptionally fine individually, but the forms represented were of exceptional value. It is impossible to do justice to such a display in the space at command, but Southern Star was one of the gems, the cup deep orange. Goldfinch (very fine flowers), Weardale Perfection, Coreen (pale orange), Victoria and Fairy were also good. It is such groups as this that keep a growing interest in this beautiful flower.

"THE GARDENERS' CHRONICLE," March 12th, 1910.

Messrs. Cartwright & Goodwin, Kidderminster, showed a group of about 60 varieties of Narcissi. The blooms were of high quality throughout, and representative of choice sorts. Two new kinds were seen in Coreen, a very regularly-shaped bloom of the "flat-eye" type, the broad ring being pale orange; and Southern Star, having a cup of deep orange colour. Amongst older varieties we noticed King Alfred, Goldfinch (extra fine flowers), White Lady, Orangeman, Sunset, Victoria, Ariadne, and Weardale Perfection (Silver-gilt Banksian Medal).

"THE GARDENER," April 16th, 1910.

Messrs. Cartwright & Goodwin again put up one of those exhibits of theirs in which good taste in arrangement is so noteworthy. Good new things comprised Scarlet Gem (Poetaz), several new doubles of remarkable colouring, and a few quite new seedlings, of which Target (Princess Mary—Chaucer), and Sailor, a fine hybrid from Minnie Hume, and Stella superba, were of the best. Silver Flora Medal.

"THE GARDEN," April 23rd, 1910.

Messrs. Cartwright & Goodwin had not such a large exhibit as usual. Their group on the 5th was mainly noticeable for two reasons. First, it introduced to the Daffodil public a few rough-haired gentlemen like Shock-headed Peter, Powder Puff, Rags and Tatters, Whirligig, and Kallikrates. They were raised by Mr. W. F. M. Copeland, and are some of his "doubles." The last-named is wholly yellow, while the others have a good deal of red about them, Powder Puff being the reddest. They are of the loose Argent type of flower. These loosely-put-together blooms will be of use for house decoration as a change from having all singles. The other feature was its lesson in earliness. Mr. Goodwin told me that Armored, Sailor, Blackwell, Dolores, Marigold, Alice Knights, and Southern Star had all been cut from the open in his grounds near Kidderminster. Before leaving this group, I would like to draw my readers' attention to a grand large yellow trumpet, Master of Balliol, and a very beautiful cupped variety, Ayacanora, which was a very pale yellow self, and in its general look featured Frank Miles. If this proves itself to have a good constitution, and to increase quickly, it should have a future.

"THE GARDENERS' MAGAZINE," April 30th, 1910.

NARCISSUS MATTHEW ARNOLD.

This is a particularly beautiful Poeticus variety, of medium size, but with broad, solid white segments, that make up a flower of the highest florist's type. The cup or crown is brilliant crimson. A.M., R.H.S., April 19th. Messrs. Cartwright & Goodwin, Kidderminster.

"THE GARDEN," April 30th, 1910.

NARCISSUS POETICUS MATTHEW ARNOLD.

A novelty in the Poeticus section of decided merit, the flowers not merely possessing a perfectly circular outline, but rare substance in the well overlapping perianth segments. The eye or crown is of intense colouring. From Messrs. Cartwright & Goodwin, Kidderminster. Award of Merit.

"THE GARDEN," May 7th, 1910.

Messrs. Cartwright & Goodwin were evidently keeping all their best things up their sleeve until Birmingham; but for all that they had some very fine things—Bert Sands, a giant bicolor incomparabilis like a rounded off Lady M. Boscawen; King Cup, the lovely rival to Homespun; White Cloud, one of the absolutely pure white triandrus hybrids; and Goldfinch, a grand deep yellow Magni. An interesting little hybrid which most people would pass by unnoticed was one that looked like a miniature Katherine Spurrell. It is the result of crossing Minnie Hume with a Jonquil, and is remarkable for having the Jonquil scent transmitted to it.

"THE GARDENERS' CHRONICLE," April 23rd, 1910.

Messrs. Cartwright & Goodwin, Kidderminster, showed a particularly good collection. Amongst the finer flowers we selected for notice Much the Miller, a new bicolor of exceptional merit; King Cup, a very handsome incomparabilis; Finespun, a rich yellow, and so named, we imagine, by reason of its refined beauty. Mrs. William Miles, a very handsome incomparabilis sort, whose big, orange, frilled crown excited admiration. Goldseeker, Admiral Makaroff, King Alfred, and Cornelia, all superbly-coloured varieties of the yellow Ajax section; with Evangeline, Amazon, and White Cloud of the Leedsii type (Silver-gilt Flora Medal).

"THE GARDENERS' CHRONICLE," May 7th, 1910.

Messrs. Cartwright & Goodwin, Kidderminster, had many handsome varieties of Narcissi, of which Rudyard Kipling (a Poeticus variety), King Alfred, Monarch (a refined, self, yellow Ajax flower), Graham Hyde (a very handsome, yellow, self variety), King's Norton, Red Sunset (a brilliant-eyed Engleheartii), Ariadne, and many beautiful triandrus hybrids of merit may be mentioned. (Silver Flora Medal).
